

Pure Terpenes Line

Top Purity. Higher Resolution. Strain-Specific Taken Further.

Enjoy our rich selection of botanical-derived terpene blends, developed by researching the best genetics in the world to perfectly match each strain terpene profile.

Top Purity Ingredients

Using only highly purified raw ingredients, with 97% average purity to ensure consistency.

Extensive Chromatography

Wide phytochemical analysis of each phenotype, to capture the complete aromatic characteristics of the strain.

High Resolution

Each formulation is featuring 40-60 botanical terpenes, Peak Perfect™, to match the original cannabis terpene profile.

Freshly Distilled

Terpenes from all natural botanical sources made in small batches to ensure freshness of raw materials, because your nose knows.

Uniquely Distinguished

Refining each terpene profile formulation to highlight the authentic notes that give rise to the legendary strain.

3rd Party CoA

For unbiased results. All formulations comply with CAT 3 California testing regulations

Peak Perfect™, Botanical-Derived

Using non-cannabis botanical sources as our raw ingredients, allows us to craft a precise and consistent aroma. By utilizing advanced analytical equipment, Eybna's Peak Perfect™ method is used to refine all formulations to perfectly match the chromatogram peaks of the strain analysis, ensuring accuracy and authenticity.

Our Chosen Phenotypes

It's all about the details. Working together with the most inspiring breeders worldwide, we identify the original phenotypes of iconic cannabis genetics. By analyzing the cannabis strains with our global network of Eybna's trusted analytical lab partners, we carefully capture these profiles and maintain their legacy.

Azul Family

Blueberry | Flo | Blue Cheese

Unique strain collection, originally bred by DJ short and characterized by unique, deep-flavored strains.

Skunk Family

Skunk #1 | Cheese | GMO

The Skunk family was formed when "Sam the Skunk Man" brought these phenotypes to the Netherlands. Known for their highly pungent and daring aroma.

Kash Family

OG Kush | Bubba Kush | Master Kush

With their origin in the Hindu Kush mountains, the Kash family features the most popular Kush strains in the world with the prominent Kush qualities.

Diol Family

Charlotte's Web | Harlequin | ACDC

Cannabidiol-rich family consists of phenotypes with earthy aroma and pleasant sweet taste.

Haze Family

Super Lemon Haze | Dutch Treat Haze
Super Silver Haze

The loveable Haze Family originated in California and was bred by the "Haze Brothers". Distinguished by their fresh green aroma.

Elite Family

Jack Herer | Strawnana | Pineapple Express
Tangie | Trainwreck | Girl Scout Cookies
Wedding Cake | Citrus Sap

The Elite collection includes the most sought after strains from all over the world with a wide variety of tastes and aromas.
